

WISE CONTROLS WIRELESS LIGHTING

WISEKEYFOB REMOTE 4 CHANNEL LIGHT GREY / B

Wisecontrols is a cutting edge, highly customisable, colour changing capable and very easy to install and use wireless lighting control system.

The Wise Controls Range of Switches and Remotes are required to wirelessly control the Wise Controls range of receivers.

The **WiseKeyfob Remote** operate in the same way as the wall mountable wireless WiseStyle Switches but in a hand held key ring attachable form.

The 1, 2 and 4 button remotes can be programmed to any of the channels on the Wise receivers, with the possibility of adding up to 32 switches. This means there is no need for two way wiring as you can just add another radio switch and place it where you like. You could keep one with your car keys and as you drive up to your house, you can switch on your garden lights and hall lights.

You can program the 1 button remote to switch more than one Wise receiver.

So for example, if you had three receivers it is possible with the 1 button switch to control a circuit from each of the receivers. There is no limit on how many Wise receivers are programmed to the same remote.

The battery life lasts up to 2 years.

Please Note: This is an updated version of the TXP433A04.
